

We are Ben and Russell Nelson, together we operate TPP Protection located in Bryan, Texas. Our family-owned business manufactures high-quality surface protection products that are proudly made in the USA and used by companies all across the United States and Canada. Currently, TPP Protection mainly services the oil and gas industry; however, our products can be manufactured in various shapes and sizes, creating a versatile product for virtually any protection need. We take great care to ensure consistency in quality, timely shipping, and competitiveness. Let our unmatched customer service and dedication to our line of products help you with your next project. We invite you to visit our website to learn more about our capabilities.

Blast Guard™

Our Blast Guard™ products are produced from a domestically sourced, proprietary vinyl formulation we call "Guardian Green." A Blast Guard™ is designed to be applied before blasting and left in place throughout painting, baking, storage, and shipping replacing the time consuming duct tape method. The strong adhesive backing applies in seconds and leaves no residue once removed. Each Guardian Green Blast Guard™ follows ANSI standard nominal dimensions; however, they can be customized to your desired shape and size and your company's logo.

Armor™ & Eco Armor™

Our Armor™ & Eco Armor™ products provide superior full-face protection and a great marketing opportunity for your company during shipment and storage. Armor™ is made of an aluminum/polyethylene composite sheet that offers a strong & reusable flange protector. Eco Armor™ is made of lightweight corrugated plastic for a more cost-effective alternative to flange protection. These flange protectors are available in all pressure classes. Both of these products may be applied using zip ties, plugs, or bolts and are more economical than plywood flange protectors.
