

Maximize your blasting performance with BARTON garnet

BARTON high-performance garnet is proven to remove surface materials faster, so you save on rental costs, labor costs, and finish projects sooner for maximum operating efficiency. You can expect:

- Lower abrasive consumption rates.
- Less dust for a safer work environment.
- Uniform surface finish and profile.
- Better coating adhesion.

U.S. Navy MIL-A-22262B(SH) | SSPC-AB-1
QPL Listed | CARB Certified

ADIRONDACK® is the hardest, sharpest, fastest-working garnet abrasive in the world.

36 CG – For removal of rust, thick coatings, and marine fouling (20-50 mils).

30/60 CG – Used to remove rust and coatings (up to 40 mils) while controlling profile.

ALLTEK® is a top-quality garnet that offers excellent performance and surface finish.

30/60 PLUS – For maintenance projects on coatings up to 20 mils.

80 HPA® – Used on new steel, aluminum, sensitive substrates, and in vapor-blasting applications.
